

# Eastgate Property

Copper, Silver, Zinc, Gold, Lead, Molybdenum

Area: 528.20 Ha

The Eastgate Property is located approximately 1.5 km to the east of Manning Park, approximately a 2.5-hour drive from Vancouver, BC. The property borders the small township of Eastgate, BC to the south and covers a section of East Ladner. A total of 9 mineral tenures cover 528.2 hectares

The project hosts 5 BC Minfile occurrences including the past producing Red Star Copper/Zinc mine.

The project has seen work dating back to the early 1900s with most of the focus on the Red Star mine, including 300 m of underground development. In the mid 1960s a total of 40 tons of ore was mined and resulted in 31.1 grams of gold, 2612.7 grams of silver, 2345.5 kilograms of copper and 2932.5 kilograms of zinc produced.

2024 sampling on the Red Star helped verify some of the described mineralization at the mine site. Of special interest was sample 996449 that returned 1.76% Cu and 48.8% Zn from a large Sphalerite boulder that has been described as Sphalerite lenses. Elevated copper was also found in a quartz grab sample 996450 that returned 0.57 ppm Au and 3.22% Cu.

At the Pasayten Gold area the sampling also verified gold in the vein system with a dump grab sample 114709 yielding 21.8 g/tonne Au.

*This property is offered for sale by way of cash or working option to purchase.*

*Preference given to companies willing to fund further exploration.*
